

Executive biography

Osman Aykut
CTO

AQM Solutions

In his role as Chief Technology Officer for AQM Solutions, a TRILOGexpert Company, Osman Aykut is responsible for the creation, design and implementation of enterprise-wide solutions, R&D, and strategic partnerships with software vendors in the mainframe quality and performance management space. In addition, Aykut leads the technical and organizational management of development teams, senior consultants and the technical support team. He is also responsible for maintaining relationships with all sales partners in Europe and the Americas.

Since 2001 Aykut has spearheaded the successful re-launch of the market-leading STROBE Automation Platform (APC for STROBE), has overseen the development of TriTune 4.0.00 (formerly BMC's InTune), and APC for TriTune

Aykut has also been instrumental in AQM Solutions Quality Assurance efforts for both product and customer implementations, overseen product development and customizing, and built strategic relationships with key customers such as BMW Group (Munich, Germany), BAWAG P.S.K. Bank für Arbeit und Wirtschaft (Vienna, Austria), and FinanzIT (Hanover, Germany).

Fluent in German, English and Turkish, Aykut was previously the Technical Director at Compuware GmbH in Düsseldorf, Germany where he was responsible for the DACH region (Germany, Austria, Switzerland) with 110 staff members.
